## Course contents

### Description

Primary school teachers have a huge responsibility to educate tomorrow's citizens, but it often feels hard for them to provide children with **360-degree, meaningful learning experiences**.

How hard does it sometimes feel to engage pupils in the lessons, to replace shallow learning with a deep understanding of topics and life competencies? If you also cope with similar issues, **project-based learning** may interest you.

In project-based learning (PBL), pupils develop deep knowledge and skills through **engaging learning activities** within a student-led, real-world, meaningful context. PBL can be used in any subject, is easily implementable, and does not require teachers to turn their jobs upside down.

During the course, not only will you discover what PBL is through a variety of inspiring examples, but you'll also find out how your own curriculum topics can be incorporated into PBL.

You'll learn which tools are best for your **primary school students**, how to effectively evaluate their learning, and how to be a good mentor in order to promote critical thinking, autonomy, collaboration, and other **21st-century skills**. Finally, you'll have the chance to plan a successful, manageable PBL activity.

By the end of the course, you'll have realized how PBL can provide you with great solutions to **design fruitful learning experiences**, and you'll have gained **confidence and enthusiasm** that is necessary to exploit the opportunities it offers.

Practical strategies and tools will be available for you to **nurture children's key competencies**, and you will be ready to use a working PBL model you'll have shaped for your own students!

### Learning outcomes

- Understand what PBL really is and how it can be useful for any educator;
- Incorporate primary school curriculum topics into PBL;
- Get hints and tools to motivate students and boost their key competencies;
- Gain insight into a variety of activities that you can use in PBL (and beyond);
- Confidently implement PBL in their classes and/or school communities;
- Assess PBL products confidently;
- Evaluate students' learning of curriculum topics;
- Create detailed, effective, manageable PBL lesson plans, suitable for primary education.
